23	LIQUIDITY COVERAGE RATIO (%)		358%
24	QUARTERLY AVERAGE OF DAILY HQLA		9,499,069,255

Liquidity Risk Management

The Liquidity Coverage Ratio ('LCR') is a regulatory requirement set to ensure that the Bank has sufficient unencumbered high quality liquid assets ('HQLA') to meet its liquidity needs in a 30-calendar day, liquidity stress scenario. The Bank monitors and reports its liquidity position as per the Bank of Mauritius Guideline on Liquidity Risk Management and has maintained its liquidity position above the prudential requirement.

- 1) The reported values for 'quarterly average of bimonthly observations' are based on January to March 2025 bimonthly figures.
- 2) The reported values "quarterly average of daily HQLA" are based on daily figures over the 1st of January 2025 to 31st March 2025's period.

The quarterly consolidated LCR was 358 % as at 31 March 2025 against the regulatory limit of 100%.

The Bank continues to maintain a strong average LCR position over the reporting period with a prudent surplus over the regulatory requirements.

High-quality liquid assets (HQLA)

The bank's HQLA as at end of March 2025 amounted to Rs. 9,569m, composed of Central Bank reserves, cash, unrestricted balances with Central Bank, Sovereign and Central Bank Securities. The daily simple averages of the HQLA held over the first quarter of 2025 was Rs.9,499m.

Main drivers and changes in LCR

The simple average of the Bank's bimonthly LCR over the first quarter of 2025 decreased to 358% compared to 397% for the fourth quarter of 2024.

This was due to a decrease in the HQLA during the first quarter of 2025 compared to the fourth quarter of 2024.

The bank continues to closely monitor the LCR to ensure that it operates with an adequate and optimum level of HQLA.

Concentration of funding and liquidity sources

The bank's funding strategy is largely driven by its policy to always maintain adequate liquidity in all currencies, and hence to be able to meet all obligations as they fall due. The main funding sources for the bank are current account deposits from retail, domestic, international corporate and financial institutions.

The bank's funding profile over the reporting period was well diversified. Customer assets were largely funded out of customer deposits, which are considered a stable source of funding and from intra group borrowings.
