23	<b>LIQUIDITY COVERAGE RATIO (%)</b>		<b>285%</b>
24	<b>QUARTERLY AVERAGE OF DAILY HQLA</b>		<b>13,365,645,720</b>

## **Liquidity Risk Management**

The Liquidity Coverage Ratio (LCR) is a regulatory requirement set to ensure that the Bank has sufficient unencumbered high quality liquid assets (HQLA) to meet its liquidity needs in a 30-calendar day, liquidity stress scenario. The Bank monitors and reports its liquidity position as per the Bank of Mauritius Guideline on Liquidity Risk Management and has maintained its liquidity position above the prudential requirement.

- 1) The reported values for 'quarterly average bimonthly observations' are based on January to March 2026 bimonthly figures.
- 2) The reported values "quarterly average of daily HQLA" are based on daily figures over 1<sup>st</sup> of January 2026 to 31<sup>st</sup> March 2026.

The quarterly consolidated LCR was 285 % as at 31 March 2026 against the regulatory limit of 100%.

The Bank continues to maintain a strong average consolidated LCR position over the reporting period with a prudent surplus over the regulatory requirements.

## **High-quality liquid assets (HQLA)**

The bank's quarterly average HQLA as at end of March 2026 amounted to Rs. 13,710m, composed of unrestricted balances with Central Bank, placement with Central Bank, Sovereign and Central Bank Securities. The daily simple averages of the HQLA held over the first quarter of 2026 was Rs.13,366m.

## **Main drivers and changes in LCR**

The Bank's simple average bimonthly LCR for the first quarter of 2026 rose to 285%, from 267% in the fourth quarter of 2026, reflecting an increase in the quarterly average HQLA. The Bank continues to closely monitor its LCR to ensure that it maintains an adequate and optimal level of HQLA.

## **Concentration of funding and liquidity sources**

The Bank's funding strategy is largely driven by its policy to always maintain adequate liquidity in all currencies, and hence to be able to meet all obligations as they fall due. The main funding sources for the bank are current account and term deposits from retail, domestic, international corporate and financial institutions.

The Bank's funding profile over the reporting period was well diversified. Customer assets were largely funded out of customer deposits, which are considered a stable source of funding and from intra and non-group borrowings.
